Profile

Results-driven AI/ML Engineer and Data Scientist with hands-on experience building production-grade LLM pipelines, Agentic RAG systems, and predictive ML models. Proficient in LangGraph, LangChain, Scikit-learn, TensorFlow, and Docker.

Education

Bachelor of Technology – Computer Science & Engineering Aug 2023 – July 2027
Central University of Haryana, Mahendragarh, HR CGPA: 7.52 / 10.0

Experience

Data Analyst Intern June 2025 – July 2025
TrendalyTix / Indore, India Remote

- Architected predictive models using Scikit-learn and Pandas to analyze real-world datasets, improving data-driven decision accuracy by optimizing automated data cleaning pipelines.
- Synthesized complex technical findings into actionable business insights; presented stakeholders with interactive visualizations to support strategic decision-making.

Artificial Intelligence Trainer (Freelance) Dec 2024 – Feb 2025
Outlier / United States Remote

- Improved LLM performance through advanced prompt engineering and chain-of-thought reasoning across STEM and coding domains.
- Executed RLHF (Reinforcement Learning from Human Feedback) workflows to evaluate and refine model outputs, ensuring technical accuracy and ethical alignment.

Projects

Agentic Data Analyst | *LangGraph · Llama-3.3 · Docker · FastAPI · Streamlit · Groq* Feb 2026

- Developed an autonomous cognitive agent using LangGraph that plans multi-step analysis, executes Python code, and autonomously resolves runtime errors via recursive self-healing reflection loops.
- Deployed a containerized application on Render using Docker, implementing sandbox guardrails to prevent malicious code execution.

BioGraph-RAG – Clinical Trial Reasoning Engine | *Llama-3 (70B) · Neo4j · LlamaIndex · Groq · GraphRAG*
Jan 2026

- Engineered a GraphRAG architecture combining Neo4j knowledge graphs with vector search to resolve complex multi-hop medical queries over unstructured clinical PDFs.
- Orchestrated Llama-3 (70B) via Groq for high-precision named entity recognition (NER), mapping Drug–Protein–Disease relationships into a structured graph schema.

Achievements

- **National Finalist – 5G Lab Innovation Hackathon (2025):** Developed AR Smart Glasses for the speech and hearing impaired using 5G URLLC for real-time communication; secured government funding for product prototyping.
- **Open Source Alpha Contributor:** Recognized for high-quality code contributions during the GSSoC (GirlScript Summer of Code) open source term.

Technical Skills

Languages: C/C++, Python, JavaScript, HTML/CSS, SQL

AI / ML: RAG, GraphRAG, GenAI, LLMs, NLP, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy

Frameworks & Tools: LangChain, LangGraph, LlamaIndex, HuggingFace, Streamlit, FastAPI, Flask, Docker, Kubernetes, Neo4j

Cloud & DevOps: AWS, CI/CD Pipelines (GitHub Actions), Git, GitHub, Linux
